given the change in federal legislation allowing the consideration of a response to intervention rti approach to making eligibility decisions for specific learning disabilities idea 2004 it is crucial to establish sufficient evidence for using curriculum based measurements cbm or cbm like measures e g dynamic indicators of basic early literacy skills dibels for monitoring students responses to interventions as part of the identification process for specific learning disabilities one critical component in an effective rti model is the availability of parallel measures suited for frequent progress monitoring to index student performance over time the current study investigated the equivalence of the twenty first grade dibels oral reading fluency Dorf progress monitoring probes using a one way anova for repeated measures participants were 68 first grade students 36 females and 32 males from two midwestern elementary schools no selection criteria other than parental consent were used the Dorf probes were given in a pseudo counterbalanced order across four days at the end of the school year to avoid instruction and practice effects the standard error of measurement sem of the twenty first grade Dorf progress monitoring probes was calculated using alternate form reliability coefficients results suggested that the equivalence assumption of the first grade Dorf was not held most of the probes were significantly different in their difficulty level from each other and did not yield consistent mean levels of performance the findings also suggested a significant magnitude of score fluctuation at the individual student level the average sem value was about 9 ranging from 8 to 10 similar to previous research findings using test retest reliability for calculation limitations educational implications for cbm orf users and researchers and directions for future research are presented

learning often begins with an experience in the body our body can tighten or feel expansive depending on different learning contexts this experience of learning in the body is crucial to holistic education this book explores embodied learning from several perspectives this first section explores how psychology can inform us about embodied learning for example the work of Carl Jung and Wilhelm Reich devoted

much of their thinking to how energy manifests itself in the body meditation and movement are also examined as ways of embodied learning for example dalcroze a form of movement education is presented within the context of whole person education the book also presents schools where embodied learning is nurtured waldorf education is discussed as well as a public school in toronto where the body is central to holistic education the book also presents visions of embodied learning john miller presents a holistic vision of teacher education and tobin hart who has written extensively in this field writes about the embodied mind embodied learning is an emerging area of inquiry in holistic education and this book presents a variety of perspectives and practices that should be helpful to both scholars and practitioners
